

Fairway Crossing Active Adult Community

Manchester & East Hartford, CT

The project also included the design of a wetlands creation area and the design of water quality basins to protect on-site inland wetlands.

Client

Fairway Crossing

Completed

2010

Description

Zuvic Carr completed the site design and permitting for an 89-unit active adult community.

Tasks included site and roadway layout, completion of a traffic study, grading, and the design of underground utilities including sanitary sewer, water supply and a storm water sewer collection and detention system. Zuvic Carr also obtained local permitting from East Hartford and Manchester.
